

I just found out that the FCC is looking at changing the way FM stations can broadcast. Apparently this new method would jeopardize K-Love from broadcasting in my area. What a tragic loss that would be!! We all need more stations that provide positive encouragement like K-Love.

K-Love has become an integral part of my day as well as my family's. It has brought me close to our community by encouraging participation in local events and acting on our beliefs and faith. It even motivated me to vote in this year's Presidential election.

It is wonderful to be able to talk with my neighbors about what I hear on K-Love. To have a positive force like K-love, when all you see on the TV or hear on other radio stations is negative news events or dramas that showcase murder, or "music" that sings about the degradation of women, is priceless. We are a small neighborhood of young families trying to raise our children with positive and encouraging examples of how to live day to day. K-Love helps do that. If K-Love were to be taken off the air, there would be a huge void in our daily lives. As a parent, what other positive public examples can I show my daughter?

I implore you not to change the way the FM stations broadcast, giving priority to these LPFM stations.
